SOFTWARE ENGINEERING EXPERIENCE

Global Tech Experience, USF 2023

- Engaged in intensive 3 month training with industry professionals, developing advanced skills in building modern and responsive websites with a concentration in user experience
- Collaborated with a dynamic team, building websites for simulated clients

MK Drone and Media Website <https://www.mkdroneandmedia.com> 2023

- Developed a website for a client's drone photography business. Incorporates high quality UI and device responsivity with HTML, CSS and Bootstrap, a functional gallery section to showcase client's projects with JS, and a contact form to connect users to the client via email with Node.js and Nodemailer

Valet Managing System 2023

- Developed a website that streamlines the valet process by collecting and storing customer information using a MongoDB database and Node.js and providing useful information about my company's services as well as the surrounding area on the landing page

Relevant Coursework: Data Structures and Algorithms • Object Oriented Programming • Front End & UI Design

WORK EXPERIENCE

Evolution PGS, Valet Attendant Oct 2022 - Present

- Collaborate with team of other attendants to provide quality valet services at a high end hotel and restaurant to ensure safety and satisfaction of guests while maintaining a professional demeanor

CapTel, Transcriber Feb 2022 - Oct 2022

- Utilized company software to transcribe real-time conversations for individuals with hearing impairment, requiring exceptional typing speed and accuracy to facilitate effective communication

Publix, Customer Service/ Deli Clerk Feb 2021 – Feb 2022

- Interacted with customers daily to ensure a premium shopping experience and efficient check-out
